

Segway[®] Fungicide

Total Pythium Protection

Segway fungicide is the standard on high value turf for control of Pythium blight, Pythium root dysfunction and Pythium damping off.

Cyazofamid, the novel and highly effective active ingredient in **Segway**, is the sole turf fungicide belonging to the Qil (Quinone inside Inhibitors) class of chemistry.

Segway's novel mode of action inhibits all stages of Pythium development delivering for both preventative and curative protection.

Active Ingredient
Cyazofamid 400g ai/L
Fungicide Group
Group 21 Qil
Formulation
Suspension Concentrate
Phytomobility
Locally Systemic / Translaminar
Package Size
6 x 1L

Total Pythium Protection

Segway is a complete Pythium specialist with strong activity against all key turf pythium species. The charts below compare the efficacy of Pythium products protection products rated in the chemical control of Turfgrass Diseases Choose **Segway** for total Pythium protection.

Chemical Control of Turfgrass Diseases

(2020, Vincelli, Munshaw, Clarke, Koch)

Rating system for fungicide efficacy.

4 = Consistently good to excellent control in published experiments.

3 = Good to excellent control in most experiments

2 = Fair to good control in most experiments

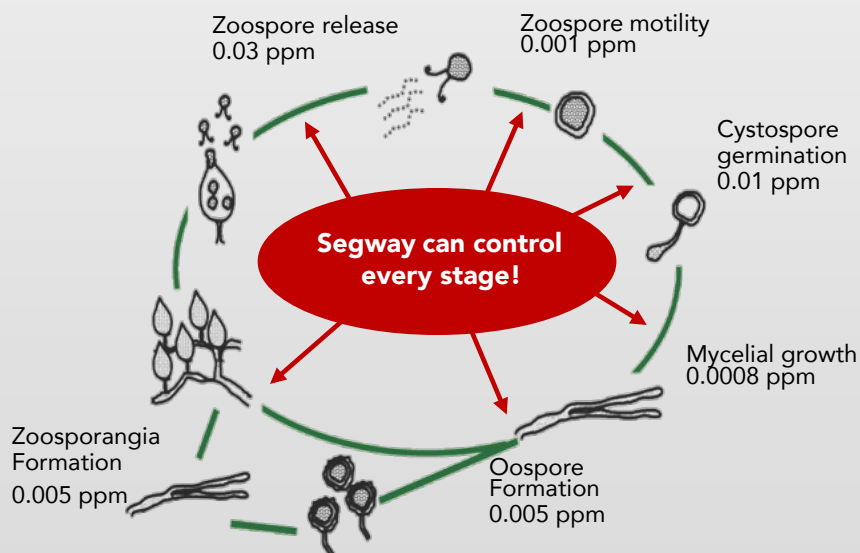

* Not registered for use in Canada

Case Coverage

Labelled Rate (/100 m ²)	1 Jug (1 L)	1 Case (6 x 1 L)
14.3 ml	1.73 acres	10.3 acres
26.6 ml	0.93 acres	5.6 acres

Preventative & Curative Activity

Cyazofamid, the active ingredient in **Segway**, belongs to fungicide group 21 (Quinone inside Inhibitors). **Segway** inhibits all stages of the Pythium fungal development resulting in rapid preventative & curative protection.

Segway Label Summary

Disease Controlled	Rate (/100 m ²)	App Interval (Days)	Water Volume (/100 m ²)
Pythium blight	14.3 – 26.6 ml	14 - 21	7.5 – 15 L
Pythium damping off			
Pythium root dysfunction			

Always read and follow label instructions.
