The control half of the fairway had near 90% kill, while the protected half had near 90% clean turf.

Alberta

Edmonton Area

Application Date: **October 24, 2019**

Water Volume: **2 gal/1000ft²**

Evaluation: **April 22, 2020**

Days After Application: **181 days**

Alberta

Polaro

Untreated

Red Deer Area

Application Date: **November 2, 2020**

Water Volume: **2 gal/1000ft²**

Evaluation: **March 27, 21**

Days After Application: **142 days**

Snow Cover: **140 days**

Alberta

Red Deer Area

Application Date: **November 2, 2020**

Water Volume: **2 gal/1000ft²**

Evaluation: **March 27, 21**

Days After Application: **142 days**

Snow Cover: **140 days**

Alberta

Calgary Area

Application Date: **November 5, 2020**

Water Volume: **2 gal/1000ft²**

Evaluation: **April 2, 2021**

Days After Application: **151 days**

Snow Cover: **104 days**

Alberta

Calgary Area

Application Date: **October 30 2020**

Water Volume: **2 gal/1000ft²**

Evaluation: **April 2, 2021**

Days After Application: **151 days**

Snow Cover: **104 days**

Pink Snow Mould (Low pressure) but active PSM
prior to application

Polaro + Chlorothalonil

Polaro

Manitoba

Application Date: **October 25, 2019**

Water Volume: **91 gal/acre**

Evaluation: **April 15, 2020**

Days After Application: **173 days**

Superintendent noted:

"I cannot tell any noticeable difference between the areas that were treated with the addition of chlorothalonil"

Untreated check

Manitoba

Winnipeg Area

Application Date: **October 18, 2020**

Water Volume: **8 L/100 m²**

Evaluation: **March 16, 2021**

Days After Application: **149 days**

Fairway treated with Polaro

Saskatchewan

Southern Saskatchewan

Application Date: **October 18, 2019**

Water Volume: **50 gal/acre**

Evaluation: **March 31, 2020**

Days After Application: **165 days**

Saskatchewan

Saskatoon Area

Application Date: **November 3, 2020**

Water Volume: **60 gal/acre**

Evaluation: **April 6, 2021**

Days After Application: **154 days**

Snow Cover: **150 days**

Saskatchewan

Yorkton Area

Application Date: **October 16, 2020**

Water Volume: **80 gal/acre**

Evaluation: **April 9, 2021**

Days After Application: **175 days**

Snow Cover: **153 days**

Ontario

Owen Sound Area

Application Date: **November 5, 2020**

Water Volume: **2 gal/1000ft²**

Evaluation: **March 26, 2021**

Days After Application: **141 days**

Snow Cover: **77 days**

Ontario

Owen Sound Area

Application Date: **November 5, 2020**

Water Volume: **2 gal/1000ft²**

Evaluation: **March 15, 2021**

Days After Application: **130 days**

Snow Cover: **76 days**

Ontario

Ottawa Valley

Application Date: **November 5, 2020**

Water Volume: **70 gal/acre**

Evaluation: **March 18, 2021**

Days After Application: **133 days**

Snow Cover: **65 days**

Ontario

Northern Toronto

Application Date: **November 6, 2019**

Water Volume: **50 gal/acre**

Evaluation: **March 18, 2020**

Days After Application: **133 days**

Northern Ontario

Owen Sound Area

Application Date: **Nov 15, 2024**

Evaluation: **March 17, 2025**

Water Volume: 1.6 gal/1000 ft² on greens, 1.5 gal/1000 ft² on fairways

Northern Ontario

Owen Sound Area

Application Date: **Nov 15, 2024**
