

Fairway Snake[®]

Undo the Dew

The **Fairway Snake** is an IPM management tool engineered to remove dew, clippings, and dried worm castings from fairways in a single pass. Its patented design allows it to maneuver and adjust to all the dips and dives of the landscape.

The **Fairway Snake** is gentle on turf as it rolls across the fairway, but durable enough to withstand routine trips around the golf course.

Durable

Gentle on Turf

Hugs the Fairway

Material
Weighted Polypropylene
Material Properties
UV and water resistant
Weight
½ lbs. per foot
Available lengths
100', 150' & 200'

Hugs the Fairway

The Fairway Snake's **weighted core** forces it across the contours of the course to ensure a clean fairway in a single pass. In addition to the weight, the Fairway Snake's flexibility allows it to maneuver and adjust to all the dips and dives of the landscape.

Durable

The braiding process adds incredible strength to the Fairway Snake. The more pull that is exerted, the more each fiber locks into place creating **strength, durability, and reliability**. The Fairway Snake is also **UV and water resistant** and has a special coating for improved wear tolerance.

Gentle on Turf & Turf Equipment

The Fairway Snake comes with a unique end unit assembly system so the Fairway Snake **rolls or spins over the turf**, unlike conventional "dragging" tools. The spinning action minimizes the stress on the turf, and allows for the use of less powerful equipment for pulling the Fairway Snake, freeing up heavy duty utility vehicles for other jobs.

One Year Guarantee

The Fairway Snake was built to work and built to last – that's why Belchim Turf offers a one-year guarantee on all Fairway Snakes. Belchim Turf will replace any Fairway Snake that breaks due to normal use within one year from the date of purchase. For more details, please contact Belchim Turf.

Fairway Snake Benefits

Use Pattern	Benefit
Removal of dew and guttation water	IPM strategy for reducing disease pressure Dry shoes for early morning golfers Clean appearance
Improved cut	Stands turf up for a cleaner cut
Clipping dispersal	Clean appearance
Break-up dried earthworm castings	Clean appearance Reduce wear and tear of mower blades

Fairway Snake Sizing Guide

Fairway Width			Fairway Snake Recommended length
Feet	Yards	Metres	
25 - 75	8 - 25	8 - 23	100 ft (30 m)
76 - 125	25 - 42	23 - 38	150 ft (45 m)
126 - 175	42 - 58	38 - 54	200 ft (60 m)

Choosing the proper length is simple but important. We recommend a Fairway Snake that is 25 feet longer than your widest fairway. This will provide the necessary slack to clean all fairways in a single pass.
