

Total Pythium Protection

Segway fungicide is the standard on high value turf for control of Pythium blight, Pythium root dysfunction and Pythium damping off.

Cyazofamid, the novel and highly effective active ingredient in **Segway**, is the sole turf fungicide belonging to the QiI (Quinone inside Inhibitors) class of chemistry. Segway's novel mode of action inhibits all stages of Pythium development delivering for both preventative and curative protection.

TURF PROTECTION CANADA

Total Pythium Protection

Segway is a complete Pythium specialist with strong activity against all key turf pythium species. The charts below compare the efficacy of Pythium products protection products rated in the chemical control of Turfgrass Diseases. Choose Segway for total Pythium protection.

Preventative & Curative Activity

Cyazofamid, the active ingredient in Segway, belongs to fungicide group 21 (Quinone inside Inhibitors). Segway inhibits all stages of the Pythium fungal development resulting in rapid preventative & curative protection.

Chemical Control of Turfgrass Diseases

(2020, Vincelli, Munshaw, Clarke, Koch)

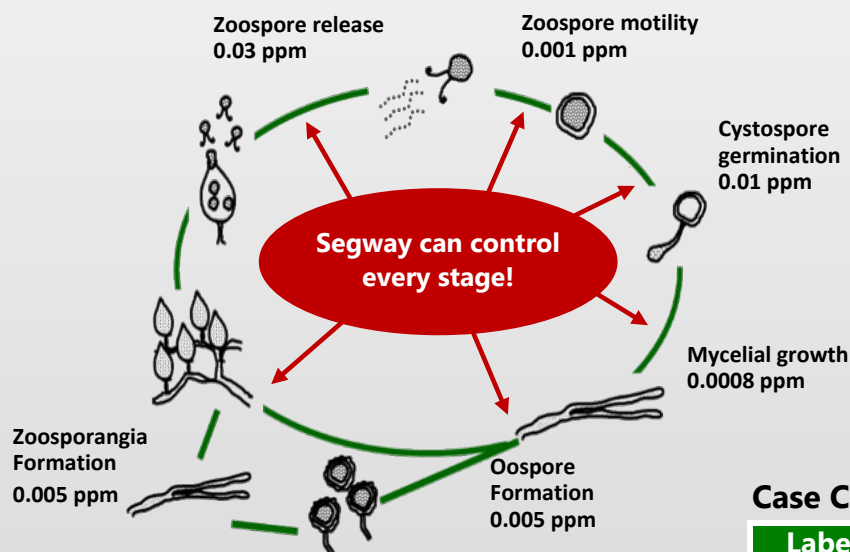

Rating system for fungicide efficacy.

4 = Consistently good to excellent control in published experiments.

3 = Good to excellent control in most experiments

2 = Fair to good control in most experiments

* Not registered for use in Canada

Case Coverage

Labelled Rate (/100 m ²)	1 Jug (1 L)	1 Case (6 x 1 L)
14.3 ml	1.73 acres	10.3 acres
26.6 ml	0.93 acres	5.6 acres

Segway Label Summary

Disease Controlled	Rate (/100 m ²)	App Interval (Days)	Water Volume (/100 m ²)
Pythium blight	14.3 – 26.6 ml	14 - 21	7.5 – 15 L
Pythium damping off			
Pythium root dysfunction			

Always read and follow label instructions.
